OVERVIEW

Software engineer with expertise in web development, web design, and artificial intelligence.

Focused on creating practical, impactful projects that benefit others.

Passionate about building tools and applications that serve real-world needs.

Aiming to contribute to projects that drive positive change and enhance user experiences.

EXPERIENCE

- **The Build Fellowship** JULY 2024 - SEP 2024
Computing Build Student Consultant
 - Completed a computing Build Project "Design an Educational Platform for Remote Learning" under the supervision of the industry expert Abiola Folaranmi
 - Focused on designing an intuitive platform from an educator's perspective, with a layout that supports lesson planning, progress tracking, and easy navigation
- **Mission Field Organizer** SEP 2023 - MAY 2024
Data Management App for Brazilian Missionaries
 - Designed and implemented a user-friendly data management application for Brazilian missionaries using React and OpenAI API
 - Developed the UI entirely in Portuguese to ensure accessibility and usability for native speakers (supports text files in Portuguese)
- **Disability Inclusion Project Student Leader** 2022 - MAY 2025
Calvin University Student Organization
 - Established an organization for students with disabilities
 - Led meetings and planned events in a team setting
- **Santiago Outreach Program** JAN 2017 - DEC 2019
Program Member
 - Worked as a volunteer for the Santiago Outreach Program in the Dominican Republic
 - Assisted several communities with various projects, spending weekends helping with construction and general management
